Project Title

PC Attachment Review Platform

Project Proposal Summary

Our project, the PC Attachment Review Platform, is a web application aimed at providing a central platform for PC enthusiasts and users to share their experiences, reviews, feedback, and help others make informed decisions when purchasing PC attachments such as keyboards, mice, monitors, etc.

Project Status

We are currently in the development phase of our project. The frontend has been developed, with plans to use NodeJS for the backend. As our project progresses, we will continue to integrate and refine these components.

Challenges Faced

Some of the major challenges we faced during phase 1 include:

- Scheduling conflicts: Coordinating our efforts was sometimes difficult due to differing schedules.
- UI/UX decisions: Selecting the right style, format, and color scheme required some experimentation.
- Consistency in development: Ensuring a uniform design across all frontend elements required communication and collaboration.
- Visualization of frontend: Without a fully connected backend, it was challenging to fully visualize the user flow and functionality of the frontend.

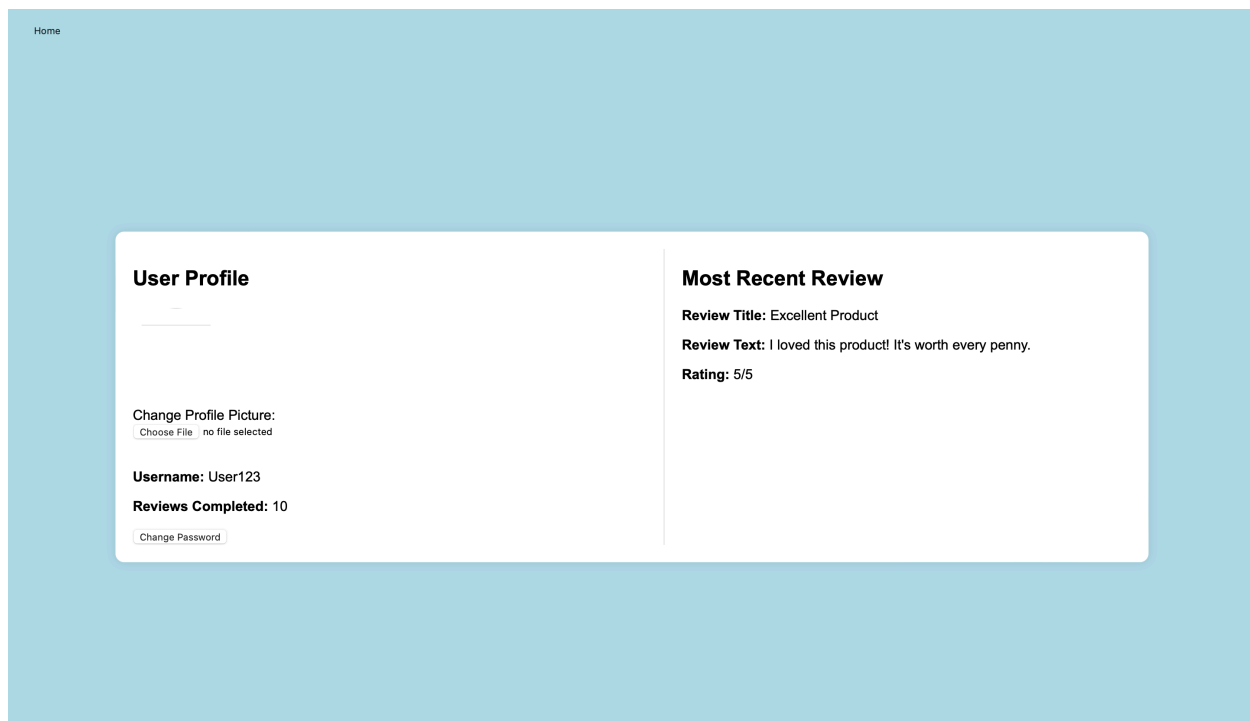

Despite these challenges, we've made great progress on our frontend development.

Code Contributions

The code contributed by Michael and Ethan is currently available in the '/frontend' directory in the GitHub repository.

Project Screenshots

Below are three screenshots representing the work completed so far:

Welcome to The PC Attachment Review Platform

Share your experiences, provide feedback, and help others make informed decisions when purchasing PC attachments.

About Us

The PC Attachment Review Platform is a community-driven web application that allows PC enthusiasts and users to post and read reviews about various PC attachments such as keyboards, mice, monitors, and more. Our goal is to provide a centralized hub for users to share their experiences and help each other make informed decisions.

Key Features

- Post and read reviews about PC attachments.
- Discover the best PC attachments based on user ratings and feedback.
- Connect with other PC enthusiasts and users.
- Stay updated with the latest PC attachment trends and news.

Looking Forward

We're confident about the progress made so far and look forward to the next phases of development. Our focus will shift towards backend development, integration of the frontend with the backend, and testing to ensure a smooth user experience.
